Artery Clamps

Outlines

Atraumatic Jaws

- Atraumatic jaws are essential for delicate surgical procedures, minimizing tissue damage while maintaining a firm grip.
- Vanité design strategically reduces the surface area in contact with tissue, which is crucial in sensitive operations like vascular and cardiothoracic surgery.
- Available in both straight and curved forms, atraumatic jaws offer versatility to meet the specific needs of each surgical task.
- The innovation behind atraumatic jaws represents a significant advancement in surgical technology, reflecting a commitment to patient safety and surgical efficacy.

Special Care Needed For Your Surgical Instruments

Staining

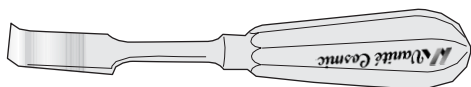

Remember Saline can indeed be corrosive to surgical instruments if they are not promptly and properly cleaned after use. This not only compromises the integrity of the instruments but can also interfere with their sterilization.
